

Delivering
**Networking, Education,
Best Practices, &
Business Intelligence**
Designed to Enhance
Business Performance.

The mission of FPDA is to equip motion control solutions providers with the tools that drive growth, profitability, and innovation. Our organization has changed with the times, always bringing our members the best in networking opportunities, knowledge, education, and training.

We represent motion control solution providers who offer fluid power, automation, and electro-mechanical technologies (the so-called “tri-technologies”) and distribution services to enhance customer performance.

“Professional growth and leadership take effort, it is built from a deep desire to constantly learn, strive for better performance and surrounding yourself with colleagues that can assist you in that journey. There is no better organization that provides this to me as a member.”

Andrea Tysdal
CFPHS, President
JEM Technical
